## PROJECTS

---

### Django - MusicApplication

05/2021 - 06/2021

This is a music site where users can create albums and add songs to it. They can play songs they like, make them favorite, and filter them according to their view

### Emotion Recognition Bot(NLP)

12/2020 - 01/2021

This bot is totally based on NLP which answers to the users what emotion their messages represent.

### Credit Card Fraud Detection(ML)

05/2020 - 07/2020

After performing various data processing & Exploratory Data Analysis techniques on data applied XGBoost, Random Forest, KNN, Logistic Regression, SVM and Decision tree to detect fraudulent transactions & fortunately, one algorithm gave a satisfactory result.
